CANNABIS IMPAIRMENT DETECTION TRAINING: FOR LAW ENFORCEMENT

MARCH 10, 2023

0800-1700

\$450

(INCLUDES LUNCH)

95 MAIN ST., SUITE 3

AUBURN, ME 04210

THE AFTERNOON PORTION WILL BE LOCATED AT 225 FIRST FLIGHT DRIVE, AUBURN, ME

Cannabis is legal and more openly used around the nation: Can you detect and articulate its impairment? Today's forms (including edibles, flower and concentrates) have a much higher level of THC than the past. With more cannabis of a stronger variety available, officers greatly benefit from green lab training to help recognize its presence in motor vehicle operators.

Training Objectives include:

- In-depth discussion about Cannabis including its different forms, legal status, and legislative history.
- A suggested and modified SFST Protocol for detecting cannabis impairment roadside as well as cannabis-impaired driving investigation techniques.
 - Field Sobriety Techniques and exercises.
 - Behaviors of impairment by cannabis commonly observed.
 - Investigation and documentation suggestions for best practices
- Building a cannabis-impaired driving court case.
- Chemical testing issues in impaired driving investigations
- Case Law updates
- Hands-on Green Lab with Volunteers Cannabis Consumers
 - In compliance with state marijuana possession laws, we present a "green" lab designed for officers to practice impairment detection skills on volunteers dosed with known amounts of cannabis. This includes flowers, edibles, and concentrates. This will provide the attendees with a gauge of the reliability of their detection skills. The lab is run by civilian instructors.

Attendees are not exposed to marijuana (or any drug) during training.

* This class is a controlled environment
for officers to evaluate actual
cannabis-dosed impaired volunteers*

GREEN LAB

CANNABIS IMPAIRMENT DETECTION OBSERVATION: FOR PROSECUTORS AND ATTORNEYS

MARCH 10, 2023

0800-1700

\$225

(INCLUDES LUNCH)

95 MAIN ST., SUITE 3

AUBURN, ME 04210

THE AFTERNOON PORTION WILL BE LOCATED AT 225 FIRST FLIGHT DRIVE, AUBURN, ME

THIS REGISTRATION IS FOR OBSERVERS ONLY. YOU WILL NOT DO THE HANDS-ON TRAINING BUT WILL WATCH THE OFFICERS COMPLETE IT AND HEAR THEIR CONCLUSIONS AND JUSTIFICATIONS.

Cannabis is legal under Maine Law and openly used around the nation: Can you detect and articulate its impairment?

Today's cannabis (including edibles, flower and concentrates) has a much higher concentration of THC in years past. With more cannabis of a stronger variety available, officers greatly benefit from green lab training to help recognize its presence in motor vehicle operators.

Training Objectives include:

- In-depth discussion about Cannabis including its different forms, legal status, and legislative history.
- A suggested and modified SFST Protocol for detecting cannabis impairment roadside as well as cannabis-impaired driving investigation techniques.
 - Field Sobriety Techniques and exercises
 - Behaviors of impairment by cannabis commonly observed
 - Investigation and documentation suggestions for best practices
- Building a cannabis-impaired driving court case
- Chemical testing issues in impaired driving investigations
- Case Law updates
- OBSERVATION OF the Hands-on Green Lab with Volunteers Cannabis Consumers
 - In compliance with state marijuana possession laws, we present a "green" lab designed for officers to practice impairment detection skills on volunteers dosed with known amounts of cannabis. This includes flowers, edibles, and concentrates. This will provide the observers the knowledge of best field practices used by officers. The lab is run by civilian instructors.

Attendees are not exposed to marijuana (or any drug) during training.

* This class is a controlled environment
for officers to evaluate actual
cannabis-dosed volunteers*
